

Basica®

Instant
Alkaline drinking powder

Thank you for purchasing Basica Instant®, a German quality product. With almost 100 years of experience, Basica Instant® is continuously adapted to the latest scientific nutritional findings. It is produced and examined according to the highest scientific and quality standards which you can rely on every day.

Basica® Energy Diet

Acid reduction – noticeable energy

A stable acid-base balance and a functioning energy metabolism are important conditions for vitality and performance.

In our stressful everyday life, time often lacks to maintain the well-balanced nutrition which the body needs in order to neutralize acid.

Basica Instant® supplies the body with alkaline minerals and valuable trace elements:

- **Zinc contributes to normal acid-base metabolism and is important for normal cognitive function**
- **Magnesium helps to reduce tiredness and fatigue**
- **Calcium, magnesium and copper support the normal energy-yielding metabolism**

Excess acid caused by unbalanced nutrition

According to proven nutritional findings, nutrition with a high consumption of meat, sausage, cheese and cereals delivers excess acid. A sufficient consumption of fruits or vegetables provides alkaline minerals in order to neutralize acid.

Lacking supply of minerals

Tiredness, fatigue and decreasing cognitive functions can be the first signs of a lack of minerals and micronutrients in the body. Diets and fasting periods can also cause a deficiency in mineral supply.

Noticeable energy with Basica®

Basica Instant® provides your body with alkaline minerals in the form of organic mineral compounds and micronutrients. Zinc contributes to normal acid-base metabolism. Magnesium helps to reduce tiredness and fatigue. The combination with calcium supports the energy-yielding metabolism. Additionally, zinc contributes to normal cognitive function.

Important information

How to further activate your metabolism with Basica® energy diet:

- **Daily exercise, for example running, cycling or Nordic walking. Sweating once in a while is good for circulation and activates your metabolism.**
- **Try to relax consciously every day. Breathing exercises, yoga or a relaxing bath help to reduce stress.**
- **Drink at least 2 litres of mineral water, unsweetened fruit juice spritzers or – for a change – herbal or fruit tea a day. An extensive supply of fluid is necessary to excrete acid more easily via the kidneys.**

Basica® Energy Diet
Acid reduction – noticeable energy

Product information Basica Instant®

- Quickly dissolving drinking powder with fruity orange flavour
- Gluten and lactose free

Information for diabetics:

The product contains sucrose (0.8 CU per day)

We recommend Basica Compact®, Basica Direct® and Basica Vital® pure.

Packaging size:

300g alkaline drinking powder

1 daily dose (15g) contains:		% NRV*
Calcium	350 mg	44 %
Magnesium	120 mg	32 %
Sodium	125 mg	—
Zinc	5 mg	50 %
Copper	1 mg	100 %
Molybdenum	50 µg	100 %
Chromium	40 µg	100 %
Selenium	30 µg	55 %
Vitamin C	80 mg	100 %
Vitamin B2	1,4 mg	100 %

* Nutrient Reference Value according to EU-regulation

Recommended daily intake:

Dissolve two measuring spoons (15g) in a glass (250 ml) of water and drink it once a day.

Put alkaline drinking powder in a dry glass

Fill up with still water

Stir the mixture until dissolved

Can be taken independently from meals. The quantity of water can be adjusted to attain a more intense flavour and sweetness.
